VIJAY KUMAR SARIKA

vijay.sarika.99@gmail.com | 8328546251 | Hyderabad

PROFESSIONAL SUMMARY

Automation Test Engineer with 5.1 years of experience in manual and automation testing across banking, insurance, and financial services. Hands-on experience with Playwright, Selenium, Java, TestNG, BDD, functional and regression testing, API testing, and automation maintenance. Strong in translating business requirements into practical test coverage, validating end-to-end workflows, managing defects, and working in Agile teams.

WORK EXPERIENCE

CAPGEMINI TECHNOLOGY SERVICES INDIA LIMITED | QA Test Engineer - Automation

Zurich | Insurance | Jan 2026 – Present

- Led QA for insurance quote-generation and Policy Finder workflows spanning 7 lines of business and 20 insurance products.
- Built a scalable Playwright framework using Page Object Model, fixtures, hooks, parallel execution and CI reporting.
- Applied Agentic AI to accelerate test-case design, test-data preparation, and Playwright script generation.
- Partnered with business analysts and developers for defect triage, consistently identifying 3-5 critical defects per sprint.

AXA - Hong Kong | Insurance | Jun 2024 - Dec 2025

- Owned Rest API focused QA for AXA Hong Kong transactional-letter workflows spanning four integrated systems and multiple downstream customer communications.
- Created API Tests using Postman and REST Assured, covering request/response payloads, HTTP status codes, mandatory fields, schema validation, and business rules.
- Validated 8 transactional-letter types by tracing source data through APIs to generate outputs, verifying policy/customer values and conditional content, and identifying 60+ defects.
- Performed integration testing, defect triage, and fix validation across dependent systems and provided reproducible evidence to client development team.

Element | Fleet Management | Feb 2023 - Jun 2024

- Automated end-to-end vehicle configuration and ordering workflows for Element Fleet Management, covering component, optional fields, and business-rule validations.
- Built and maintained Selenium WebDriver automation in Java using TestNG, Page Object Model, reusable locators, explicit waits, data-driven testing, and assertions.
- Managed a 180-test regression suite through Jenkins, using execution logs and screenshots to analyze failures, identify flaky tests, and validate release stability.
- Performed defect triage and root-cause validation with developers, retested fixes, and updated automation as vehicle configuration and ordering rules evolved.

Royal Bank of Canada | Banking | Jan 2022 - Feb 2023

- Author and run 150+ qTest cases covering digital onboarding and credit card user flows.
- Validate end-to-end onboarding and credit card journeys with functional, exploratory, smoke, and regression coverage.
- Log and track 50+ critical JIRA defects through resolution, including retesting fixes before closure.
- Partner with developers and business teams to resolve issues before UAT releases.
- Support stable UAT releases by retesting fixes and validating affected workflows.

SKILLS

Testing: Manual Testing, Functional Testing, Regression Testing, Smoke Testing, Exploratory Testing, Test Scenario & Test Case Design, SDLC, STLC
Automation: Playwright**,** Selenium WebDriver, TestNG, BDD, Cucumber, REST Assured, Automation Frameworks
Programming: Java, JavaScript, SQL, OOP
Tools: Postman, Jenkins, GitLab, JIRA,
Methodologies: Agile, Sprint Planning, Defect Management, Test Estimation
AI-Assisted Testing: Agentic AI, AI-Assisted Test Case and Test Data Creation

EDUCATION

Vellore Institute of Technology | July 2017 - May 2021
Bachelor of Technology - Computer Science and Engineering

MANAGEMENT AND LEADERSHIP SKILLS

Team Collaboration: Demonstrated effective teamwork and collaboration within cross-functional teams.
Mentoring: Provided guidance to junior engineers and experienced team members on functional aspects and frameworks.
Leadership: Managed team dynamics, resolved conflicts, and fostered a productive work environment.
